PERGAMON

Journal of Thermal Biology 24 (1999) 151–154

Journal of
THERMAL BIOLOGY

Subject Index: Volume 23

Acclimation,
effect on CTMax of two crab species, 107.
effect on metabolic rate, gill ventilation and ECG in *Oreochromis*, 283.
effect on thermoregulation response to DNP in rats, 63.
lack of effect on hsp70 production in *Plethodon*, 259.
Acclimatization,
and hibernation, 224.
Age,
effect of on recovery from chill coma in *Drosophila*, 291.
Ambient temperature.
effect on metabolic rate, gill ventilation and ECG in *Oreochromis*, 283.
effect on metabolic rate in *Bathygobius soporator*, 31.
effect on muscle pH in antarctic teleost, 275.
effect on rectal temperature in humans during sleep, 15.
Amphibia, 49, 259.
Arachnids, 23.

Bathygobius soporator, 31.
Behaviour,
avoidance, and peripheral thermosensitive neurons in *Helix*, 111.
Behavioural thermoregulation,
in short-horned lizards at high elevation, 395.
lack of evidence for in *Spodoptera* larvae, 131.
Birds, 53, 123, 311, 369.
Body temperature,
and face cooling in man, effect on colour preference, 335.
and garment wettedness in humans, 41.
effect of room temperature on during sleep in humans, 15.
effect on light intensity on in man, 353.
geographical variation of in *Sceloporus* lizard species, 329.
in *Bufo marinus*, 49.
in cold and warm acclimated rats, effect of DNP on, 63.
in insects, dependency on size, orientation and wind speed, 5.
in mammals and the evolution of its regulation, 157.
in rats in response to repeated administration of pyrogens, 387.
in short-horned lizards at high elevation, 395.
measurement of in chick embryos, 123.
model for in humans, 117.
of *Spodoptera* larvae in the field, 131.
preferred in bull snakes, 319.
set-point determination, a theory for ionic basis of, 193.
tympanic, effect of light intensity on in man, 99.
Bradymetabolism, 207.
Brassica oleracea, 81.
Bufo marinus, 49

Calcium,
regulation of heart performance by in a teleost, 31.
Cancer pagurus, 107.
Carcinus maenas, 107.
Cell culture, 69.
Chill coma,
recovery from in *Drosophila*, 291.
Cloth colour preference,
in humans on face cooling, 335.
Clothing,
biophysical properties and skin wettedness in humans, 41.
Cold exposure,
effect of DNP on thermoregulatory response to in rats, 63.
Cold tolerance,
recovery from in *Drosophila*, 291.
Columba livia, 53.
Convective heat exchange,
in insects, dependency on size, orientation and wind speed, 5.
Convective heat transfer coefficient,
in an insect, 5.

Critical thermal maximum,
of *Macrobrachium rosenbergii*, 381.
of *Plethodon* sp., 259.
of *Spodoptera* larvae, 131.
of two species of crab, 107.
Critical thermal miminum,
of *Macrobrachium rosenbergii*, 381.
of *Spodoptera* larvae, 131.
Crustacean, 107, 381.

Development,
linear model for effect of temperature on in spiders eggs, 23.
Developmental temperature,
conditions for in pigeon embryos, 53.
effect on body size, weight and wing length in *Drosophila*, 301.
Drosophila melanogaster, 291, 301.

Endothermy,
development of in avian embryos, 369.
Equus equus, 59.
Evaporative and thermal resistances,
model for in humans, 117.
of garments and body temperature in humans, 41.

Febrile tolerance,
development of in rats in response to bacterial lipopolysaccharide but not interleukin-1β, 387.
Fever,
and metabolic rate in *Bufo*, 49.
and pyrogens, 211, 387.
Fish, 31, 275, 283, 359.
Flight,
and heat loss in barn owls, 311.
Freezing,
survival of nematodes to, 75.
use of infrared imaging for ice nucleation studies in plants, 81.

Gallus domestica, 369.
Gill ventilation,
and acclimation in *Oreochromis*, 283.
Growth temperature,
effect on body size, weight and wing length in *Drosophila*, 301.
for pigeon embryos, 53.

Harpagifer antarcticus, 275.
Heart,
electrocardiagrams of in *Oreochromis*, 283.
performance and Ca2+ regulation, effect of temperature on in a teleost, 31.
Heart rate,
effect of light intensity on during bathing at 38.5°C in man, 353.
effect of temperature on in *Bathygobius soporator*, 31.
in *Oreochromis*, 283.
Heat loss,
conductive in human infants, 267.
estimations of in horses, 59.
IR thermography measurement of in barn owls, 311.
Heat production,
effect of DNP on in cold and warm acclimated rats, 63.
in barn owls, 311.
in chick embryos, 123, 369.
Heat shock proteins,
production of in *Plethodon* sp., 259.
Heat stroke,
and physiological and blood parameters of anesthetized miniswine, 341.
development of a model for using miniswine, 341.
Heat transfer,
control of in mammalian thermoregulation, 164.
models for in man in relation to environmental change, 117.
Helix pomatia, 111.
Hibernation,
central nervous system in, 224.
Human, 15, 41, 99, 117, 267, 335, 353.
Hyperthermia,
in rat glial cells in culture, effect on PGE_2 production, 69.
Hypothermia,
effect on mitochondrial activity in plants, 1.
thermoregulatory response to in cold and warm acclimated rats, 63.

Ice,
nucleation in plants, studies using infrared imaging, 81.
Incubation temperature,
comparison of nest and incubator on development of pigeon embryos, 53.
Indomethacin,
inhibition of hyperthermia induced PGE_2 production in rat glial cells, 69.
Infrared thermal imaging, 81, 267, 311.
Insect, 5, 131, 291, 301.

Lepomis macrochirus, 359.
Life history strategies,
and the effect of temperature on development in spiders, 23.
Light intensity,
effect on body temperature prior to bathing at 38.5°C in humans, 353.
effect on sweating threshold and skin temperature in humans, 99.

Lipid composition,
of *Lepomis* from heated and normothermic ponds, 359.
Locusta migratoria, 5.
Lower critical temperature,
in horses, 59.

Mammal, 15, 41, 59, 63, 69, 99, 117, 143, 267, 335, 341, 353, 387.
Melanoplus bivittatus, 5.
Melanoplus sanguinipes, 5.
Melatonin,
effect of light intensity on excretion rate of in humans, 99, 353.
effect on preferred temperature of bull snakes, 319.
Metabolic rate,
and fever in toads, 49.
and temperature in a marine teleost, 31.
in acclimated *Oreochromis*, 283.
measurement of in developing avian embryos, 369.
Metabolism,
factors in determining basal, 200.
Mitochondria,
activity of and stress proteins during hypothermia in plants, 1.
Model,
for blood potassium changes during heat stroke in miniswine, 341.
for lower threshold temperature and thermal constant in spiders, 23.
for mammalian thermoregulatory system, 228.
of convective heat exchange in insects, 5.
of thermal stability in humans under changing environments, 117.
use in validation of effect of helox on thermal conductance, 377.
Mollusc, 111.
Muscle,
of antarctic teleost, effect of temperature on pH of, 275.

Nematode, 75.

Oreochromis niloticus, 283.

Phenotypic plasticity,
and growth temperature in *Drosophila*, 301.
Phrynosoma douglassi, 395.
Phytoplankton,
biofouling in cooling water of power stations, 91.
Pituophis melanoleucus, 319.
Plant, 1, 81.
Plethodon cinereus, 259.
Plethodon jordani, 259.
Plumage,
and heat loss in barn owls, 311.
Preferred body temperature,
in bull snakes and effect of melatonin and chlorpromazine, 319.
Prostaglandin production,
LPS induced in rat glial cells, inhibition by hyperthermia, 69.

Rattus sp., 63, 387.
Reproduction,
effect of long term thermal perturbation on in *Lepomis*, 359.
Reptile, 319, 329, 395.
Respiratory rate,
and acclimation in *Oreochromis*, 283.

Sceloporus sp., 329.
Seasonal effect,
on CTMax of two crab species, 107.
Sea water effluent,
biofouling of by phytoplankton, 91.
Secale cereale, 1.
Set-point,
in mammalian body temperature regulation, 147, 170, 195.
Sex,
dependency on for recovery from chill coma in *Drosophila*, 291.
Skin temperature,
and garment wettedness in humans, 41.
effect of light intensity on in humans, 99.
Sleep phase,
body temperature during in humans, 15.
Solanum tuberosum, 81.
Spodoptera exempta, 131.
Steinernema carpocapsae, 75.
Steinernema glaseri, 75.
Steinernema riobravis, 75.
Stress proteins,
production of in plants during hypothermia, 1.
production of in *Plethodon* sp., 259
Suis suis, 341.
Sweating rate,
effect of light intensity on threshold of in man, 99.

Tachymetabolism, 207.
Thalassiosira sp., 91.
Thermal conductance,
effect of helox on and use of heated models for validation of, 377.

Thermal ecology,
and water relations of *Spodoptera* larvae, 131.
Thermal resistance,
of garments and body temperature in humans, 41.
Thermal stability,
in man under changing environmental conditions, 117.
Thermoneutral zone,
in horses, 59.
Thermoregulation,
and light intensity in man, 353.
behavioural in short-horned lizards at high elevation, 395.
considerations of the principles of, 145.
development of in avian embryos, 369.
effect of chlorpromazine and melatonin on in bull snakes, 319.
effect of DNP on in cold and warm acclimated rats, 63.
model for the central neurology of, 152.
role of the hypothalamus, 171.
Thermosensitivity,
of neurons, role in regulated body temperature, 180.
of peripheral nerves in *Helix*, 111.
Thermosensors,
properties of in mammals, 159.
Triticum aestivum, 1.
Tyto alba, 311.

Wind speed,
effect on convective heat loss in insects, 5.
